

Security Industry Personal Privacy and Social Media Best Practices

Description

Administered through The Security Officer Network's custom curriculum and assessment portal, this course details best practices for social media use and examines the art of balancing the benefits of online promotion with potential personal safety concerns.

Objectives

Upon completion of the course, the participant should:

Understand basic best practices of personal social media hygiene;

Have an awareness of online professional networking techniques;

Create an effective but safety-minded online professional promotion presence; and

Prepare for a "going quite" strategy when needed.

Requirements

The participant must submit eight reading assignments and complete a seven-question timed assessment.

Level

This is a basic level course; it is suitable for all participants.
